

## STATEMENT OF PURPOSE

### RS21362

This legislation primarily returns the authority to set speed limits, within city limits of an incorporated city anywhere in the State of Idaho, to the Idaho Transportation Department (ITD). In establishing speed limits within city limits ITD must do an investigation and base posted speeds on sound traffic engineering safety standards. A municipality may still do its own study and request a different posted speed from ITD.

## FISCAL NOTE

None to the General Fund. Idaho Transportation Department may incur budget expenses for changed speed limit signs.
